Buenos Aires, February 5, 2021

Rafael Carrion, M.D.  
Professor and Chairman  
Department of Urology  
University of South Florida

Dear Professor Carrion,

First of all, I would like to thank you and the Department of Urology of the University of South Florida for opening the doors of a great education to young doctors in Latin America. As you are aware, we promoted the “Fellowship in Sexual and Reproductive Medicine – Urology” through our over 12,000 member database, social media, and webpage. There was great interest from all over Latin America!

After a very careful analysis of credentials, curriculums and scores, we finally interviewed the candidates by zoom platform. The CAU scholarship office has decided to select Dr. José Manuel Quesada Olarte as the winner of the USF/CAU scholarship.

Dr. José Manuel Quesada, is Peruvian citizen, and he is finishing his residency in Hospital Universitario La Paz in Madrid Spain. He is a member of the CAU, through the Peruvian Society of Urology. The Peruvian Society of Urology supported his application for this scholarship. He has met all the requirements from the CAU stand point of view and has all the credentials to formally become a Clinical Fellow in the Department of Urology at USF.

Hoping that this successful academic collaboration between USF and CAU can continue year after year, I send you my best wishes for you, your family and the urology department that you successfully lead.

Sincerely,

### **SECRETARÍA CAU**
